Task Objective

- Analyse unencrypted HTTP traffic using Wireshark to identify potential exposure of login credentials or other sensitive information.
- The goal was to inspect captured packets, follow relevant streams, and recognise how insecure protocols can reveal data in plaintext during network communication.

Steps Performed

1. Identify an Insecure Website

- First, select a website that uses HTTP instead of HTTPS.
- Since HTTP traffic is not encrypted, the transmitted data can be intercepted.

2. Start Packet Capture in Wireshark

- Open Wireshark and start capturing packets on the active network interface.

3. Create a Test Login

- Visit the insecure website and sign up or log in using a username and password.
- This action sends login data over the network.

4. Stop the Packet Capture

- After submitting the login form, go back to Wireshark and stop the packet capture.

5. Filter HTTP Traffic

- In the Wireshark filter bar, type: http
- This will display only HTTP packets, making it easier to analyze relevant traffic.

6. Look for HTTP POST Requests

- Login credentials are typically transmitted through **HTTP POST requests**.

- Identify the POST request generated when the login form was submitted.

7. Inspect the Packet Details

- In the packet details pane, locate the section labeled:
  HTML Form URL Encoded

8. View the Captured Credentials

- Expanding this section reveals the **username and password in plain text**, demonstrating how insecure HTTP can expose sensitive information.

Journal of Research and Development in Pharmacological Practices

This is blind peer-reviewed journal that provides a platform which aspires to cover all the aspects of Pharmacological Practices. This journal provides a deep insight in advancement and research in the field of Pharmacological Practices.

Focus and Scope

- Ayurvedic Medicine
- Novel Drug Delivery Systems
- Herbal Medicines Research
- Nanotechnology in Medicines
- Pharmaceutical Biotechnology
- Alternative Medicines
- Drug Design
- Drug Regulatory Affair
- Pharmacy Practice
- Toxicology

ISSN: 3107-7986

Journal of Education and Development

Journal of Education and Development *(JED)* is a professional journal devoted to addressing current issues and future developments in education. The aim of the journal is to strive to strengthen connections between research and practice within the field of education and human development.

JED adopts a double-blind peer-review policy, contributed by international reviewers. The journal is published in both printed and online versions. Online publications are free to access and download.

Scopes of the journal include, but not limited to:

- Childhood and Adolescent Development
- Curriculum and Instruction
- Educational Methods and Practice
- Educational Psychology
- Educational Technology
- Higher Education
- Human Development
- Internationalization of Education
- Learning, Teaching & Training
- Philosophy of Education

The journal accepts submissions both online and via e-mail (**jed@julypress.com**).
